PROFILE SUMMARY

Backend-focused Software Engineer with hands-on experience building Django-based SaaS applications, RESTful APIs, and database-driven systems. Proven ability to design scalable backend architectures, implement real-world features, and take ownership of products from concept to execution. Strong foundation in Python, PostgreSQL, and full-stack development.

EDUCATION

- **Bachelor of Technology in Information Technology**
Inderprastha Engineering College, AKTU 2025

WORK EXPERIENCE

- **Software Developer Intern** November 2025 – January 2026
Oxford Software Institute (Delhi, India)
 - Developed and maintained backend modules for a SaaS application using Django and PostgreSQL.
 - Built secure REST APIs supporting CRUD operations, search, tagging, filtering, and user-based access control.
 - Implemented product features such as favorites, public prompt library, version history, and theme switching.
 - Designed scalable architecture with plans for premium features such as analytics and exports.
 - Used Git for version control and Postman for API testing in an Agile development workflow.

TECHNICAL SKILLS

- **Programming:** Python, SQL, JavaScript
- **Web Development:** Django, React, REST APIs, MVC Architecture
- **Database Management:** PostgreSQL, MySQL, Database Design, ORM (Django ORM, SQLAlchemy)
- **Software Engineering:** Full-Stack Development, OOP, CRUD Operations, SaaS Architecture
- **Tools & Technologies:** Git, Postman, VS Code, Agile Methodologies, Tailwind CSS

PROJECTS

- **Prompt Vault – AI Prompt Manager**
 - → Built a full-stack SaaS platform for managing and sharing AI prompts.
 - → Developed Django REST APIs with search, tagging, and filtering features.
 - → Implemented favorites, public library, version history, and dark mode.
 - → Designed scalable architecture supporting future premium features.
- **GitHub Profile Analyzer – Developer Portfolio Insight Tool**
 - → Built a full-stack web app to analyze GitHub profiles and generate developer insights.
 - → Integrated GitHub API to fetch repository data, stars, followers, and language metrics.
 - → Implemented README scoring and improvement suggestions.
 - → Developed a responsive dashboard using React, Tailwind, and Django.
